

**To solve Disk space is too low. Only 0.471GB left on /tmp.**

Step 1: stop the jenkins service

Cmd: `sudo systemctl stop jenkins`

Step 2: Switch to root user and move to / location

Cmd: `sudo su && cd /`

Step 3: Unmount the /tmp directory

Cmd:

`umount /tmp`

Step 4: Editing "fstab" file and adding the following line

Cmd: `sudo nano /etc/fstab`

**ONCE THE EDITOR OPENS ADD THE FOLLOWING  
LINE AT THE BOTTOM**

`tmpfs      /tmp      tmpfs   defaults,size=2G   0 0`

**SAVE AND EXIT THE EDITOR**

Step 5: Mounting the tmp directory

Cmd: `sudo mount /tmp`

Step 6: Start the jenkins service

Cmd: `systemctl start jenkins`
